**Subject:** PU-14-842 Dakota Access - reportable injury #4

**Importance:** High

Good Morning Commissioners:

I have received notification from Kathy Moreno, a HR representative of Dakota Access, indicating that a tractor driver (employed by DAPL subcontractor Indianhead Pipeline Services, LLC) was found yesterday afternoon slumped over the steering wheel of a tractor at the Williston spread. The individual was bleeding from the head, disoriented, vomiting, and unable to articulate the reason for his condition. He was initially transported to a hospital at Tioga and then transferred to Trinity Hospital in Minot. He is now in a coma. No further information about his current medical state can be released at this time due to HIPAA regulations.

DAPL personnel are currently investigating the scene of the incident. Moreno is en route to the hospital and will provide follow-up information as it becomes available.

Per the Certification to Order Provisions attached to the Order in this case (provision #27, see below), Dakota Access is required to notify the Commission within five business days when an injury to any person occurs.

- 27. Company understands and agrees that it shall advise the Commission of any extraordinary events which take place at the site of the transmission facility, including injuries to any person, or the death of any threatened or endangered species on the site within five business days of such event.**

Please let me know if you would like me to obtain any additional information concerning this matter.

Thanks,  
Julie
